‘By 2020 four out of five drugs
launched will be precision
medicine drugs’

— Thomas Wilckens

PROGRAM

- 16:00 Arrival at COBIS
- 16:30 Intro REBBLS and program
- 16:45 Thomas Wilckens, CEO InnVentis (keynote)
- 17:30 Break
- 17:45 Filippo Bosco, CEO Blusense Diagnostics
- 18:00 Mads Aaboe Jensen, Senior Principal Scientist & Leader of RNA Research, Roche Innovation Centre Copenhagen
- 18:15 Casper Götzsche, CSO Combigene
- 18:30 Panel debate with all speakers
- 19:15 Networking (incl dinner and drinks) until ca. 21.00

REBBLS is hosting our annual kickoff event where we invite interesting people from the biotech community to discuss topics about the future of biotech. This year we are focusing on the future of Precision Medicine with our keynote speaker Thomas Wilckens.

Precision medicine is a medical model that uses better diagnostics (Blusense), tailored gene therapies (Combigene, Roche) and other customizable healthcare to Precision

medicine (PM) is a medical model that proposes the customization of healthcare, with medical decisions, practices, and/or products being tailored to the individual patient.

This model will figure out how to fix the old broken R&D paradigm to make the next medicines safer, more cost effective and cheaper to the patient.
